WE MAKE BUILDING EASY® When you build a Veridian home, you get much more than a home designed around you and your dreams. You get the peace of mind that comes with nationally-recognized, award-winning, quality craftsmanship and energy efficiency. You get a home that’s constructed using innovative building materials as well as the newest technology and building practices. The result is a high-performing, green and energy efficient home that’s a healthier home for you and your pocketbook. And when you build with Veridian Homes, you build with a team of specifically trained experts who make homebuilding easy.
Actual floor plans and elevations may differ from those shown based on modifications, options and improvements to the plans by the builder.

- Cathedral, vault and tray ceiling options
- Custom built-ins
- Whirlpool and soaking tub options
- Personalized closet systems
- Additional green materials/products
- Personalize your home with thousands of options found within our Design Studio

CERTIFIED HIGH-PERFORMING HOMES
BUILDING ENERGY EFFICIENT, GREEN HOMES SINCE 2001
A LOOK INSIDE THE FULLER’S ENERGY EFFICIENCY. Each point decrease in the HERS Index means a 1% reduction in energy consumption. Based on this, the Fuller is 71% more energy efficient than a typical used home. The HERS Index is a scoring system created by the Residential Energy Services Network (RESNET), and provides comparable energy efficiencies in various homes. Only a RESNET certified independent energy rater can determine a home’s score. This energy scale is based on the U.S. Department of Energy’s EnergySmart Home Scales. Actual energy savings may vary depending on a number of factors including the number of people living in the household, consumption habits, age/condition of electronics and appliances used, and lifestyle; and are not guaranteed.

*Estimated average monthly energy bill savings with the Fuller. The costs were calculated using REM/Rate™ 12.97 and the HERS Score for the reference homes listed in the arrow chart and were published by RESNET, as compared to the typical used home. The typical used and new home scores were determined by the U.S. Department of Energy.
